**Diamond Qualification**

The first DA42 simulator from Diamond Simulation GmbH & Co. KG equipped with the new Garmin GFC700 autopilot was qualified in March by the Federal Office of Civil Aviation (FOCA) as FNPT II according to JAR FSTD A at Horizon Swiss Flight Academy in Kloten, Switzerland. Horizon is the country's most important flight training organisation and has trained over 4,000 pilots.

Also in March, the first New Generation (NG) DA40 Level 5 flight training device from Diamond Simulation received qualification at Moncton Flight College (MFC) in Moncton, Canada. MFC, one of the oldest Canadian flight training organisations offers training for all aviation licenses as well as MPL training in the framework of the alliance with CAE Global Academy. MFC already uses Diamond DA20 and DA40 aircraft.
